

# Ericom<sup>®</sup> Blaze

## A BREAKTHROUGH IN RDP ACCELERATION AND COMPRESSION

### EMPOWER USERS WITH 10-25X FASTER GRAPHICS & ANIMATIONS!

A superior end-user experience is critical to the overall success of any remote access solution. With Ericom Blaze, RDP suddenly becomes a much faster, more responsive, and extremely efficient remote display protocol that also dramatically reduces bandwidth consumption and optimizes RDP network traffic across the WAN/LAN.

#### Microsoft RDP

#### Ericom Blaze

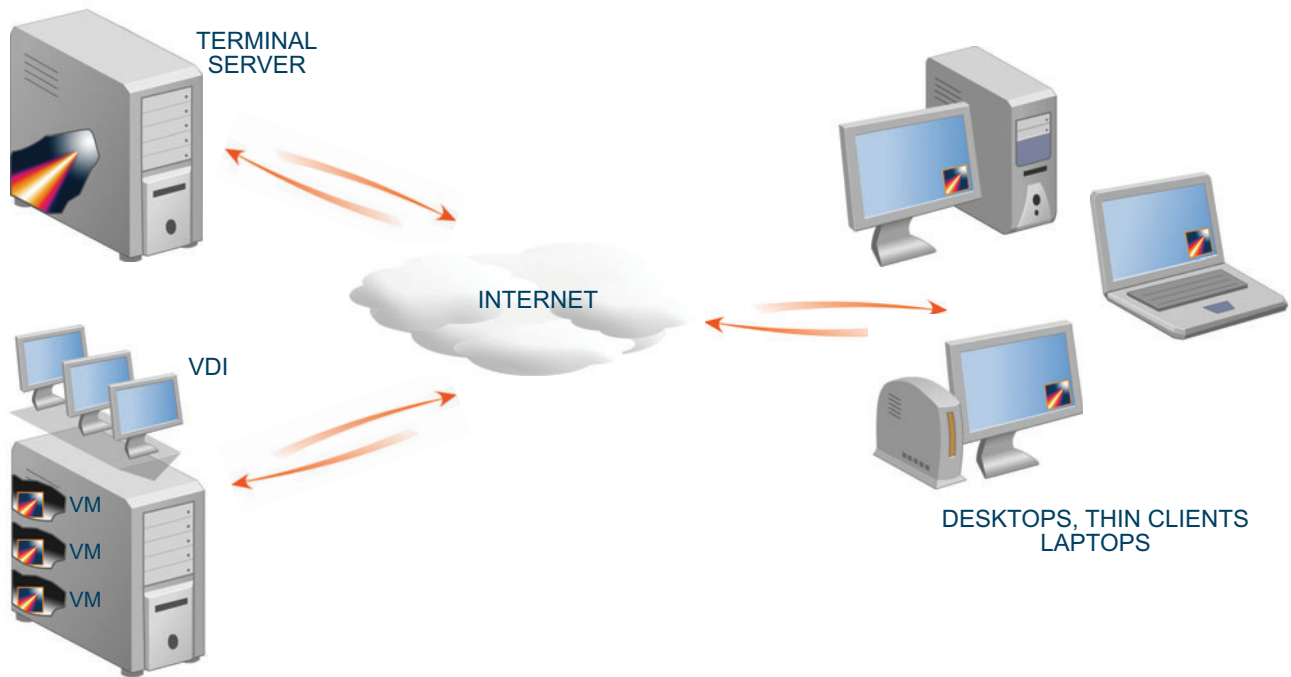

Side-by-side, performance comparison between Microsoft RDP and Ericom Blaze over a WAN connection.

### ERICOM BLAZE HIGHLIGHTS

- Accelerates the delivery of graphics-rich content, such as browsers, flash animations and other media-rich applications, over WAN, congested LANs and slow network connections
- Delivers a superior local PC-like experience to remote users, dramatically enhancing the user experience and productivity
- Removes RDP performance barriers to the widespread adoption of Desktop Virtualization (VDI), Presentation Virtualization (SBC/TS) and thin client computing
- Reduces RDP bandwidth consumption by up to 25 times and mitigates the effects of slow and high latency connections, including modem, WAN wireless and cross-continent connections
- Significantly reduces the number of IT complaints relating to poor network performance and user experience
- Speeds up RDP connections to Windows Terminal Servers, Virtual Desktops (VDI) and Physical Desktops (Blade PCs/Remote Workstations) by up to 25 times in select WAN scenarios
